LAWTECHNOS RESEARCH - TEMPLATE

AI Use Policy Template for Firms

A starting policy you can adapt in a day.

About this resource

A starting policy you can adapt in a day. This sample edition shows the structure of the full template published by the LawTechnos research desk for legal teams across the GCC.

What the template covers

A starting text you can adapt, with drafting notes in the margin explaining each clause and the choices you need to make.

Adapting it

Replace the bracketed fields, delete the options that do not apply and keep the drafting notes out of the version you circulate.

Bilingual use

Where you need English and Arabic versions, agree which text prevails and have both reviewed together, not one after the other.

How to use it

Read it alongside your own policies and the current text of the laws it refers to. Every reference in the full edition carries its source and the date it was last checked. Laws and regulator guidance change: confirm each point with qualified counsel before you rely on it.
